Bouncy castle notes

Add rainbow balls

Add on rainbow balls.
Add another layer of fun, kids LOVE it!

How many kids?

MEGA range can hold 400-500kg OR **20-40 kids**.
LARGE range can hold 300kg OR **15-20 kids**.
MEDIUM range can hold 200kg OR **10-13 kids**.
And yes, can hold adults' weight too.

Outdoors

If placed outdoors, there'll be a **surcharge** (depending on the size).
We take good care of our bouncy, being exposed to the elements, we'll need to clean it properly; and if it rains, to prevent mould.

Bouncy too tall

If the bouncy's height exceeds your venue's height - it's still possible to get the bouncy. Because the bouncy isn't uniform in height throughout, only some parts are higher. Also, **it's okay if bouncy is squashed 20-30cm on top, against the ceiling**. We've done many events like this, and it won't affect the playing.

No lift

If there's no lift and our team has to carry the bouncy up the stairs, **there'll be a surcharge** (depending on stairs distance).
Because our bouncy is super heavy - each 100kg or more. So we have to cater manpower for that.

What's needed?

Just normal 13amp power socket, for the air blower.
